Contents

Introduction	5
Papers	7
Popular books	69
Proceedings	77
Reports	157
IAC conferences	161
Special Issues of Acta Astronautica	199
Cosmic Search	219
Miscellaneous meetings	225

Introduction

This document is continuously updated, this is not a definitive version. The date on the cover is used to indicate the latest update

This work has been commissioned by the International Academy of Astronautics (IAA) SETI Permanent Committee as part of the history of SETI working group. It is not intended as an ultimate reference in the matter but rather a compilation of publications related to SETI. It should be used as a starting point of any SETI bibliographic research.

This document has been produced as a Portable Format Document (PDF). Any software that is used to display the PDF can also do search (ctrl-F) inside the document.

For any corrections or additions, please send your comments to jgsdumas@gmail.com

Acknowledgements

Thanks to

Alexander Panov for his help in the translation of some Russian documents.

Andrew J. Sutter and Jürgen Lehmann for sharing their lists of SETI papers.

PAPERS

This section deals with papers related to SETI

Papers in this section may be also found in other sections when they are published in proceedings or reports.

The following table has four columns. The first is an index. The second lists the authours of the publication. The third column is the title. The fourth column lists information related to the papers such as the journal, the volume, etc. The whole table has been sorted by first authour.

POPULAR BOOKS

List of books related to SETI

This chapter deals with popular books written by a single author (or only few) as oppose to a proceedings that is written by many authors.

The following table has four columns. The first is an index. The second lists the author(s) of the publication. The third column is the title. The fourth column lists information related to the book. The whole table has been sorted by first author.

(B001)	Allen, T.	The Quest: a report on extraterrestrial life	Chilton books, 310p, (1965)

PROCEEDINGS

Those are proceedings from conferences, and books that are collection of papers written by several authors.

This chapter deals with proceedings written by a several authors and edited by a few people. They are mostly the product a conferences.

For each proceedings, the title of the book is given and the names of the people in charge of its edition. Informations related to the publisher is also provided. Then a short table of content listing all the contributions and their authors.

List of proceedings

Archaeology, anthropology and stellar communication ed. D. Vakoch	129
Bioastronomy – the next steps ed. G. Marx	131
Biostronomy: the search for extraterrestrial life – the exploration broader eds. J.Heidmann and M.J. Klein	85
Civilizations beyond earth: extraterrestrial life and society eds. D. Vakoch and A.A. Harrison	122
Communication with extraterrestrial intelligence ed. D. Vakoch	142
Communication with extraterrestrial intelligence ed. C.Sagan	80
Communication with extraterrestrial intelligence eds. J.Billingham and R.Pesek	104
Cosmos & culture: cultural evolution in a cosmic context	126

eds. S.J. Dick and M. Lupisella	
Interstellar communications: scientific perspective eds. C. Ponnampерuma and A.G.W. Cameron	95
Interstellar communication ed. A.G.W. Cameron	82
Exobiology eds. M.M. Freundlich and B.M. Wagner	92
Exobiology: matter, energy and information in the origin and evolution of life in the universe eds. J. Chela-Flores and F. Raulin	138
Extraterrestrials – where are they? eds. B. Zuckerman and M.H. Hart	124
Extraterrestrial civilizations, ed. G.M. Tovmasyna	121
Extraterrestrial civilizations: problems of interstellar communication ed. S.A. Kaplan	96
Extraterrestrial life an anthology and bibliography eds. E.A. Shneour, E.A. Ottesen	93
Extraterrestrials: Science and Alien Intelligence ed. E. Regis	145
Life in the universe – from the miller experiment to the search for life on other worlds eds. J. Seckbach, J. Chela-Flores, T. Owen and F. Raulin	113
Life sciences and space research eds. R. Holmquist and A.C. Stickland	128
Searching for extraterrestrial intelligence – seti past, present and future ed. H.P. Shuch	119
Serendipitous discoveries in radio astronomy eds. K. Kellermann and B. Sheets	99
SETI science working group report eds. F. Drake, J.H. Wolfe and C.L. Seeger	147

Strategies for the search for life in the universe ed. M.D. Papagiannis	111
The search for extraterrestrial intelligence: NRAO workshop 1985 eds. K.I. Kellermann and G.A. Seielstad	102
The blue dot workshop ed. J. des Marais	97
The problem of search for life in the universe eds. V.A. Ambartsumian, N.S. Kardashev and V.S. Troitskii	148
The search for extraterrestrial life: recent developments ed. M.D. Papagiannis	106
The Search for Extraterrestrial Intelligence eds. P. Morrison, J. Billingham and J. Wolfe	136
Third IAA symposium on searching for life signature eds. S. Dumas and A. Panov	151
Third decennial US-USSR conference on SETI ed. S. Shostak	153

COMMUNICATION WITH EXTRATERRESTRIAL INTELLIGENCE

edited by Carl Sagan (MIT Press, 1973)

This is the English translation of the Byurakan meeting.

Extrasolar planetary system

Gold, Ambartsudian, Moroz, Pariisky

Extraterrestrial life

Sagan, Crick, Mukhin

The evolution of intelligence

Hubel, Stent

The evolution of technological civilization

Lee, Flannery, Markarian

The lifetimes of technological civilizations

Shklovsky, Platt, Stent, Minsky, Gold

The number of advanced galactic civilizations

Sagan, Marov, Lee, von Hoerner, Kardashev, Ildis

Astroengineering activity : the possibility of Extraterrestrial intelligence in present astrophysical phenomena

Dyson, Kardashev, Ginburg, Marx

Techniques of contacts

Drake, Kardashev, Troitsky, Gindilis, Petrovich, Pariisky, Moroz, Oliver, Townes

Message contents

Panovskin, Kuznetzov, Sukhotin, Minsky

The consequences of contact

Morrison, McNeill

Nature of probability statements in discussions of the prevalence of extraterrestrial intelligent life

Terrence Fine

Added comments on "the prevalence of humanoids"

G.G. Simpson

The world, the flesh and the devil

Freeman J. Dyson

Infrared observations and Dyson civilizations

Martin Harwit

Searching for GODot

Joshua Lederberg

Tachyon bit rates

Martin Harwit

X-ray pulses for interstellar communications

James L. Elliot

INTERSTELLAR COMMUNICATIONS

a collection of reprints and original contributions

edited by A.G.W. Cameron (W.A.Benjamin inc., 1964)

Is communication possible with intelligent beings from other planets?

Iosif S. Shklovskiy

History of our galaxy

A.G.W. Cameron

The origin of the solar system

A.G.W. Cameron

The early development of the Earth

A.G.W. Cameron

Chemical evolution

Melvin Calvin

Occurrence of life in the universe

Su-Shu Huang

The problem of life in the universe and the mode of star formation

Su-Shu Huang

Life-supporting regions in the vicinity of binary systems

Su-Shu Huang

The sizes of habitable planets

Su-Shu Huang

Stellar life zones

A.G.W. Cameron

Search for artificial stellar source of infrared radiation

Freeman J. Dyson

Gravitational machines

Freeman J. Dyson

Radioastronomy and communication through space

Edward Purcell

The general limits of space travel

Sebastien von Hoerner

Searching for interstellar communications

Giuseppe Cocconi and Philip Morrison

How can we detect radio transmissions from distant planetary system?

Frank D. Drake

Project Ozma

Frank D. Drake

Detection of intelligent signal from space

J.A. Webb

Coherence in interstellar signals

M.J.E. Golay

Radio signals from other planets

R.N. Bracewell

Problem of transmission in interstellar communication

Su-Shu Huang

Some potentialities of optical masers

B.M. Oliver

Interstellar and interplanetary communication with optical masers

R.N. Schwartz and C.H. Townes

Life in the galaxy

R.N. Bracewell

Communication from superior galactic communities

R.N. Bracewell

Interstellar communication

Philip Morrison

The search for signals from other civilizations

Sebastien von Hoerner

Extraterrestrial intelligent life and interstellar communication : an informal discussion

J.P.T. Pearman

Interstellar communication

B.N. Oliver

Interstellar communication and human evolution

Robert Ascher and Marcia Ascher

Future research on interstellar communication

A.G.W. Cameron

Outlook regarding interstellar communication

Philip Morrison

BIOSASTRONOMY

the search for extraterrestrial life – the exploration broader

edited by J.Heidmann and M.J. Klein (Springer-Verlag, 1990)

Proceedings of the third international symposium on bioastronomy held at Val Cenis, Savoie, France, 18-23 June 1990

The creation of free energy

G. Marx

Particulate disks around main sequence stars

D.E. Backman and F. Paresce

Bursts of star formation in the local galactic disk and their implications for the origin and evolution of life around the sun and nearby stars

A.A. Suchkov

Testing Theories of Star Formation

J.N. Evans II

Towards an estimate of the fraction of stars with planets from velocities of high precision

B. Campbell, S. Yang and A.W. Irwin, G.A.H. Walker

On the feasibility of extra-solar planetary detection at very low radio frequencies

COMMUNICATION WITH EXTRATERRESTRIAL INTELLIGENCE

edited by J. Billingham and R. Pesek (ACTA Astronautica, vol.6, Pergamon Press, 1979)

This special issue of ACTA ASTRONAUTICA is devoted to the subject of Communication with Extraterrestrial Intelligence (CETI)

This volume contains most of the papers presented at these Review Sessions in 1975, 1976 and 1977. It contains also a paper on a design concept for a large space radiotelescope, by V. I. Buyakas and several other Soviet authors from the Space Research Institute, USSR Academy of Sciences, which was presented in another session at the 1977 IAF meeting. We have introduced one further paper. It is the first part of a recent publication entitled "The Search for Extraterrestrial Intelligence: SETI" prepared for the NASA Ames Research Center by a team of U.S. Scientists under the chairmanship of Philip Morrison. We feel it is of interest because it represents an up-to-date condensation of many of the fundamental questions and conclusions about SETI at this time.

Activities of the IAA CETI committee from 1965-1976 and CETI outlook

IAC CONFERENCES

List of papers presented during the International Aeronautical Congress (IAC). The International Academy of Aeronautics (IAA) SETI Permanent Committee has two sessions during those meetings. The SETI conferences started in 1972 therefore only those IAC conferences are listed.

(work in progress: this chapter will be updated as soon as the information related to the meetings will be available)

When the title is inside parentheses it is the main topic and not the real title. My searches did not found those titles but rather a summary of the paper.

1972 – Vienna, Austria

Only four papers were read and discussed at the 1972 review meeting.

1973 – Baku, USSR

This is not the complete list of papers submitted at Baku.

Troitsky V.S.	Scanning of Sporadic Radiation Resulting from Technical Activity of Extraterrestrial Civilization
Gindilis L.M., Kardashev N.S., Mirovsky V.G., Soglasnov V.A., Spangenberg E.E. and Etkin V.S.	A Search for Signals from Extraterrestrial Civilizations by the Method of Synchronous Dispersion Receiving
Zakirov U.N.	On the Energetic Optimal Trajectories of a Probe to Search Extraterrestrial Civilizations

1974 – Amsterdam, Netherland

Four papers of wide ranging interest were read and discussed under the chairmanship of R. Pesek.

Pesek, R.	(related to a CETI survey for the years 71-74)
Troitsky, V.S. and Kardashev, N.	(about the range of frequencies for their observations)
Lawton, A.T.	Interpreting signals from an interstellar probe
Subotowicz, M.	The use of neutrinos for interstellar communication

1975 - 77

The 1975 IAF was at Lisbon, Portugal, the 1976 was Anaheim, USA and the 1977 was at Prague, Czechoslovakia. A selection of papers from the three meetings was published in a single proceeding untitled *Communication with extraterrestrial intelligence* (see page 104)

1978 – Dubrovnik, Yugoslavia

(The following list is not complete and the title may be wrong)

Gatewood, G.	Detection of Planets near Distant Stars
Ganti, T.	Chemotons – The Fundamental Particles of Life
Draganic, I. and Draganic, Z.	Ionizing Radiation May Have Started Life

1979 – Munich, Germany

Two sessions of 8 papers (only 7 papers are listed). Only the authors and a summary were found and not the title of their paper.

Campbell, B.	(about the function and nature of terrestrial intelligence)
Korovin, Y.A.	(related to the Drake Equation)
Wolczek, O.	(terrestrial factors such as magnetic field reversal and climatic stability which may have allowed intelligence to evolve on this particular planet)

Seeger, C.	(related to design a sophisticated signal processor for SETI applications)
Ganti, T.	(the use of self-replicating, preprogrammed, liquid machines by advanced civilizations)
Tarter, J.	(about the search of 207 nearby solar type stars at frequencies near the 18 centimeter lines of the hydroxy radical (OH))
Richer, D.J.	(about information theoretic approach might help determine a most likely value for "N")

1980 – Tokyo, Japan

1981 – Rome, Italy

1982 – Paris, France

IAA-82-262	Shostak, S. and Tarter, J.C.	SIGNAL (Search for Intelligence in the Galactic Nucleus with the Array of the Lowlands)
IAA-82-263	Tarter, J.C., Duquet, R.T., Clark, T., and Lesyna, L.	Recent SETI Observations at Arecibo.

1983 – Budapest, Hungary

IAA-83-269	Ponnamperuma, C.	The chemical basis of extraterrestrial life
IAA-83-270	Oro, J.	Major chemical evolutionary phases for the emergence of life in planetary systems
IAA-83-271	Troitsky, V.S.	Development regularities of extraterrestrial intelligence and the search strategy
IAA-83-272	Papagiannis, M.D.	A natural selection of galactic societies imposed by the limits of growth
IAA-83-273	Wiesenberger, I.	Use of cosmic interactions for benefit of mankind

IAA-83-274	Kent, S. and Ubil, D.	Popular support for the search for extraterrestrial
IAA-83-275	Corliss, J.B.	Sea-floor hot springs, dissipative structure and the abiotic synthetic of living organisms on Earth-like planets
IAA-83-276	Hilton, W.F.	Thoughts on ionospheric amplifications of low frequency signals
IAA-83-277	Klein, M.J.	The NASA SETI program: objectives of the R&D activity
IAA-83-279	Zuckerman, B.M.	Preferred frequencies for SETI observations
IAA-83-280	Marz, G.	The question of simultaneity
IAA-83-281	Marochnik, L.S. and Mukhin, L.M.	Galaxy "Belt of Life"
IAA-83-282	Tarter, J.C.	SETI and serendipity
IAA-83-283	Almar, I.	The rate of cosmic discoveries and the influence of ETI on it
IAA-83-284	Subotowicz, M.	The mass, time and energy characteristics of interstellar flight during long proper time of the astronauts

1984 – Lausanne, Switzerland

IAA-84-235	Papagiannis, M.D.	The first IAU symposium on extraterrestrial life
IAA-84-236	Ponnanperuma, C.	Cosmochemistry and life in the universe
IAA-84-237	Oro, J.	Major chemical evolutionary phases for the emergence of life in planetary systems
IAA-84-238	Balaza, B.A.	The importance of the special galactic position of our Sun from the aspect of searching for optimal strategies for detecting extraterrestrial intelligence

IAA-84-239	Martin, A.R.	Is mankind unique in the Galaxy?
IAA-84-240	Wiesenberger, I.	Human artificial intelligence
IAA-84-241	Finney, B.R.	SETI and interstellar migration
IAA-84-242	Ducrocq, A, Souchier, A and Merbold, U.	SETI experiment in spacelab 1
IAA-84-243	Valdes, F. and Freitas, R.A.	A search for the tritium hyperfine line from nearby stars and a search for extraterrestrial artifacts (SETA)
IAA-84-244	Culler, D.K., Oliver, B.M. and Wolfe, J.H.	Sensitive detection of narrowband pulses
IAA-84-245	Tarter, J.C.	Using the very large array (VLA) sythetis ra- dio telescope to perform a parasitic search for extraterrestrial intelligence (SETI)
IAA-84-246	Seeger, C.L.	Recent progress in the NASA SETI program
IAA-84-247	Subotowicz, M.	Threats to CETI-SETI, possible solutions and the anthropic principle (AP)

1985 – Stockholm, Sweden

Hjalmarson, A.	Organic molecules in space
Billingham, J.	The evolution of complex life
Davies, R.E.	Panspermia: unlikely, unsupported, but just possible
Hall, P.J.	The anthropic principle: probability and pos- sibility of extraterrestrial life
Nelson, N.N.	Some diplomatic and journalistic implications of SETI

SPECIAL ISSUES OF ACTA ASTRONAUTICA

Those are the special issues of Acta Astronautica devoted only to SETI.

Volume 6, Issue 19, 1979, eds: J. Billingham and R. Pesek	200
Volume 19, Issue 11, 1989, eds: C.L. Seeger and A.R. Martin	201
Volume 21, Issue 2, 1990, eds: J.C. Tarter and M.A. Michaud	202
Volume 26, Issues 3-4, 1992, ed: J. Heidmann	204
Volume 29, Issues 10-11, 1992, ed: Rodolfo Monti	207
Volume 42, Issues 10-12, 1998, ed: J. Heidmann	209
Volume 46, Issues 10-12, 2000, ed: R. Bhatal	211
Volume 67, Issues 11-12, ed: J. Elliott	213
Volume 68, Issues 3-4, ed: J. Elliott	215
Volume 78, ed: J.Elliott	217

Volume 6, Issue 19, 1979

Acta Astronautica

Vol. 6, Issue 19

Pergamon Press 1979.

Printed in Great Britain

edited by J. Billingham and R. Pesek

This special issue of Acta Astronautica was published as a book. The list of papers is given at page 104

Volume 19, Issue 11, 1989

Acta Astronautica (SETI-1)

Volume 19, Issue 11, Pages 855-932 (November 1989)

edited by C.L. Seeger and A.R. Martin

J.C. Fletcher	Space: 30 years into the future	Pages 855-857
T.V. Ruzmaikina	Origin and evolution of planetary systems	Pages 859-862
J. Billingham	The evolution of complex life	Pages 863-868
J.B. Corliss	The flow of energy, natural learning systems and the creation of life on Earth	Pages 869-873
V.S. Troitskij	Development of extraterrestrial intelligence and physical laws	Pages 875-887
M. Subotowicz	Threats to CETI-SETI: Possible solutions and anthropic principle	Pages 889-895
M.D. Papagiannis	Toward a multi-path approach for SETI	Pages 897-902
G.M. Gruber, J. Pfeiderer	Small duty cycles in SETI	Pages 903-906
J. Tarter	Radio frequency interference at Jodrell Bank observatory within the protected 21 cm band	Pages 907-912
S. von Hoerner	An asymmetric shaped mirror system for the Arecibo telescope, and its uses for SETI	Pages 913-918
S. Gulkis	Analysis of a crossed Bragg cell acousto-optical spectrometer for SETI	Pages 919-925
J.F. Duluk, I.R. Linscott, A.M. Peterson, et al J. Twicken	VLSI processors for signal detection in SETI	Pages 927-932

Volume 21, Issue 2, 1990

Acta Astronautica (SETI-2)

Volume 21, Issue 2, Pages 69-154 (February 1990)

edited by J.C. Tarter and M.A. Michaud

J. Tarter and M. Michaud	Preface	Pages xi-xii
J. Billingham	Risk and value analysis of SETI	Pages 69-72
J. Heidmann	SETI false alerts as "laboratory" tests for an international protocol formulation	Pages 73-80
P.B. Boyce	Signal verification in the real world: When is a signal not a signal?	Pages 81-84
P.B. Boyce	The first two steps after the signal arrives: Verify and tell the world	Pages 85-88
J.M. Logsdon, C.M. Anderson	Announcing the first signal: Policy aspects	Pages 89-92
Z. Paprotny	Signals from ETI detected — What next?	Pages 93-95
A. Tough	A critical examination of factors that might encourage secrecy	Pages 97-102
A.E. Goodman	Diplomatic and political problems affecting the formulation and implementation of an international protocol for activities following the detection of a signal from extraterrestrial intelligence	Pages 103-108
R. Pinotti	Contact: Releasing the news	Pages 109-115
B. Finney	The impact of contact	Pages 117-121
V. Kopal	International law implications of the detection of extraterrestrial intelligent signals	Pages 123-126
A.A. Cocca	XII Tables for researchers on extraterrestrial intelligence	Pages 127-130
E. Fasan	Discovery of ETI: Terrestrial and extraterrestrial legal implications	Pages 131-135
A.E. Goodman	Diplomacy and the search for extraterrestrial intelligence (SETI)	Pages 137-141

G.C.M. Reijnen	Basic elements of an international terrestrial reply following the detection of a signal from extraterrestrial intelligence	Pages 143-148
D. Goldsmith	Who will speak for earth? Possible structures for shaping a response to a signal detected from an extraterrestrial civilization	Pages 149-151
	Declaration of principles concerning activities following the detection of extraterrestrial intelligence	Pages 153-154

Volume 26, Issues 3-4, 1992

Acta Astronautica (SETI-3)

Volume 26, Issues 3-4, Pages 139-297 (March-April 1992)

edited by J. Heidmann

J. Heidmann	Introduction	Page 139
L. Perek	An introduction to the first Rudolf Pešek SETI lecture	Page 141
F. D. Drake	Reflections on the modern history of SETI	Pages 143-144
D.W. Latham, Robert P. Stefanik, Tsevi Mazeh	Spectroscopic searches for low-mass companions of stars	Pages 145-149
J. Pearson	The Moon and SETI	Pages 151-155
J. Oro and A. Lazcano	Recent advances in chemical evolution and the origins of life	Pages 157-158
J.F. Duluk Jr, A. Jeday, M. Massing, et al	The MCSA 2.1: A fully digital real-time spectrum analyzer developed for NASA's SETI Project	Pages 159-168
P.R. Backus, J.C. Jordan, D.G. Harper	Real time data acquisition in SETI	Pages 169-172
J. Tarter	SETI field tests with the MCSA 1.0 prototype and plans for radio astronomical observations	Pages 173-176
M.J. Klein, S. Gulkis, H.C. Wilck, et al	Status of the NASA SETI Sky Survey microwave observing project	Pages 177-184
J. Billingham, Jill Tarter	Detection of the Earth with the SETI microwave observing system assumed to be operating out in the galaxy	Pages 185-188
M. Lampton, S. Bowyer, D. Werthimer, et al	The SERENDIP piggyback SETI project	Pages 189-192
P. Horowitz, K. Clubok	High resolution SETI: Experiences and prospects	Pages 193-200
F. Biraud and J. Tarter	Conclusion of the selected target search at the Nançay Observatory	Pages 201-204
J. Heidmann, F. Biraud, J. Tarter	Pulsar-aided SETI experimental observations	Pages 205-209

F.R. Colomb, M.C. Martín, G.A. Lemarchand	SETI observational program in Argentina	Pages 211-212
H.C. Kahlmann	SETI and the radiospectrum	Pages 213-217
W.J. Welch	A strategy for SETI observations at Arecibo Observatory	Pages 219-221
J.W. Dreher	Rejection of RFI by means of interferometry	Pages 223-226
M.J. Klein, S. Gulkis, E.T. Olsen, et al	An assessment of the impact of radiofrequency interference on microwave SETI searches	Pages 227-232
J. Tarter	Summary of interference measurements at selected radio observatories	Pages 233-238
G. Swarup	Giant Metrewave Radio Telescope—Its possible use for SETI	Pages 239-242
S. von Hoerner	Suggestions for a large southern radio telescope	Pages 243-248
N. Cohen	The gravitational lens as an intergalactic communication tool	Pages 249-251
I. Almar	Analogies between Olbers' Paradox and the Fermi Paradox	Pages 253-256
D.M. Raup	Nonconscious intelligence in the Universe	Pages 257-261
B. Finney	SETI and the two terrestrial cultures	Pages 263-265
C.L. De Vito	Languages based on science	Pages 267-271
W.A. Reupke	Efficiently coded messages can transmit the information content of a human across interstellar space	Pages 273-276
R. Pinotti	ETI, SETI and today's public opinion	Pages 277-280
D.E. Tarter	SETI and the media: Views from inside and out	Pages 281-289
M.A.G. Michaud	An international agreement concerning the detection of extraterrestrial intelligence	Pages 291-294
M.A.G. Michaud, J. Billingham and J. Tarter	A reply from Earth?	Pages 295-297

Volume 29, Issues 10-11, 1993

Acta Astronautica (SETI-4)

Volume 29, Issues 10–11, Pages 735–876 (October–November 1993)

World Space Congress

MISCELLANEOUS MEETINGS

List of papers presented during miscellaneous meetings, other than those already listed in other chapters.

USRI Helsingki meeting, 1978

International Scientific Radio Union (URSI) Conference on SETI at Helsinki, Finland, August 2, 1978, K. I. Kellerman and N. S. Kardashev, Organizers.

list of papers:

B.M. Oliver	Review of SETI and Current Ames Proposals
S. Gulkis	The JPL All-Sky Search
J. Tarter	SETI Observations of 201 Nearby Stars Using a 100,000-channel Spectrum Analyzer
F. Drake	SETI Programs at the Arecibo Observatory
F. Biraud	Wide-Band Signals as Call Signals for Interstellar Communication
R. Wielebinski and J. Seiradakis	Observations of Some Nearby Stars for Pulsed Signals
M. Morimoto	Preferred Frequencies for Interstellar Communications
W. Sullivan III	Eavesdropping: The Radio Signature of the Earth
S. Gorgolewski	SETI at Very Low Frequencies
B. F. Burke	A Skeptic's View

NASA AMES research center conference, Moffett Field, 1979

National Aeronautics and Space Administration (NASA) Ames Research Center Conference on "Life in the Universe" at Moffett Field, California, June 19 and 20, 1979, John Billingham, NASA Ames, General Chairman.

list of papers:

Sherwood Chang	Organic Chemical Evolution
Benton C. Clark	Sulfur: Fountainhead of Life in the Universe
Duwayne M. Anderson	The Role of Interfacial Water and Water in Thin Films in the Origin of Life
Lynn Margulis	Evolution of the Biosphere
Karl Turekian	The Origin and Evolution of Continents and Oceans
Donald Hunten	Climatological Stability
Martin Cohen	Stellar Influences
Robert Harrington	Planetary Orbits in Multiple Stars
Gustaf Arrhenius	Constraints on Early Life by Earth's Accretional and Pre-Accretional Development
Stephen Schneider and Starley Thompson	Cosmic Conclusions from Climatic Models: Can They be Justified?
James Kasting and Thomas Donahue	Evolution of Oxygen and Ozone in the Earth's Atmosphere
David Black	A Review of Prospects for Detecting Other Planetary Systems
Simon P. Worden	Detecting Planets in Binary Systems with Single Aperture Interferometry
J. William Schopf	Biogeocosmopoetry: Major Events in the Evolution of Life on Earth and Speculations Regarding their Possible Relevance to Extraterrestrial Evolution
Alexander Rich	The Origins of the Protein Synthetic System
James Valentine	The Emergence and Radiation of Multicellular Organisms
Dale ussell	Speculations on the Evolution of Intelligence in Multicellular Organisms
Bernard Campbell	Evolution of Technological Species
Wallace Tucker	Astrophysical Crises in the Evolution of Life in the Galaxy
Kenneth Towe	Biochemical Keys to the Emergence of Complex Life
Sanford Siegel and B. Z. Siegel	Gravity, Liquification and Land Plant Evolution: A Study of Chemo-Mechanical Adaptation and Its Concomitants
Owen Lovejoy	The Evolution of Man and Its Implications for General Principles of the Evolution of Intelligent Life
Kenneth Janes	The Identifiability of Suitable Stars
Ronald Bracewell	Manifestations of Advanced Civilizations
Bernard Oliver	Search Strategies
Woodruff Sullivan III	The Radio Signature of Earth
Robert Edelson	A Sky and Frequency SETI Survey: Plans, Rationale and Status
John Wolfe	High Sensitivity Observations
Philip Morrison	Reflections

Where Are They?

A Symposium on the Implications of Our Failure to Observe Extraterrestrials, at College Park, Maryland, on November 2 and 3, 1979. Michael H. Hart, Trinity University, Ben Zuckerman, University of Maryland, and Michael D. Papagiannis, Boston University, were the organisers.

list of papers:

Michael H. Hart	Introduction: Where Is Everybody?
Benjamin Zuckerman	The Search for Radio Signals from Extraterrestrial Civilizations
Robert Sheaffer	Shortcomings in the Hypothesis that the Earth Is Being Visited by Extraterrestrials
Sebastian von Hoerner	The Unlikelihood, If N is Large, That No Race Will Explore and Colonize
Ronald Bracewell	Preemption of the Galaxy by the First Advanced Civilization
Freeman Dyson	Spaceships and Propulsion Techniques
Cliff E. Singer	O'Neill Colonies in Space
Robert Ettinger	Possible Techniques for Freezing Space Voyagers
James Oberg	Planetary Engineering
Eric C. Jones	An Estimate of the Time Needed to Colonize the Galaxy
Cyril Ponnampereuma	Pre-biotic Chemical Evolution
Hubert Yockey	A Calculation, Using Information Theory, of the Probability of Spontaneous Biogenesis
P. Edward Argyle	Chance and Origin of Life
Gerald Feinberg and Robert Shapiro	Possible Forms of Life in Environments Very Different from the Earth
Gerrit L. Verschuur	Cosmic Hazards to Planetary Life
Michael Papagiannis	Colonies in the Asteroid Belt, and a Missing Term in the Drake-Sagan Equation
Virginia Trimble	The Age of the Galactic Disk
Shiv S. Kumar	The Relative Frequency of Single and Multiple Stars
Pat Harrington	The Frequency of Planetary Systems in Our Galaxy
Michael H. Hart	Atmospheric Evolution, and an Analysis of the Drake-Sagan Formula
