

IAA SETI Committee Report

IAA SETI Committee Report

The IAA SETI Committee last convened in Milan during the International Astronautical Congress (IAC) 2024. The Chair's notes from this meeting can be accessed here:

[IAA SETI Committee IAC 2024 – Notes from the Chair](#)

Ongoing Activities

The committee is actively engaged in several key initiatives:

1. Revision of the IAA SETI Post-Detection Protocols (PDP)

- The committee is drafting a new version of the IAA SETI Committee Post-Detection Protocols (PDP), replacing the 2010 edition.
- A preliminary draft was presented at IAC 2024.

2. Community Consultation on the PDP Draft

- Feedback is being collected from SETI Committee members and the broader scientific community.
- This input will inform further revisions and refinements of the protocol.

3. Preparation for the IAA SETI Symposium at IAC 2025

- Planning is underway for the SETI Symposium at IAC 2025, ensuring a strong programme of discussions on technosignature searches, post-detection strategies, and emerging societal themes.

4. Next IAA SETI Committee Meeting at IAC 2025

- The committee aims to present and discuss an updated version of the draft PDPs during the next meeting in Sydney.
- The goal is to finalise or significantly advance the PDP document at IAC 2025.

Recent Engagements

The IAA SETI Committee also participated in and co-organised a SETI session as part of the symposium on the Peaceful Use of Space Technology – Health (IPSPACE 2024). This event took place from 10–13 December 2024, with a hybrid format (online and in-person) in Hainan, China. The session facilitated discussions on the intersection of space technology, peaceful applications, and SETI research. The session was very productive and demonstrated the interest of China in this field, especially through observations using the giant FAST radio telescope.

The committee remains committed to fostering collaboration, dialogue, and policy development in the global Search for Extraterrestrial Intelligence. For further details or to contribute to ongoing discussions, committee members and the wider community are encouraged to engage with our initiatives.
